COUNTRY:

Canada

TECHNOLOGIES:Microsoft Intune
MovoSuite for IntuneDriving Cost Savings in Canadian Education
with Microsoft Intune and MovoSuite**STRATEGY AND GOALS**

The presence of iPads in the classroom adds management complexity that has driven most DSBs in Canada to adopt expensive mobile device management (MDM) tools. With millions in budget cuts at the provincial level, Ontario DSBs were looking for areas to cut spending. Trading 3rd party MDM for Intune licenses they already owned was on the table, but *could IT customize Intune to deliver on their classroom use cases?*

CHALLENGES

Education brings with it special requirements for endpoint management beyond the native capabilities of Microsoft Intune:

- ❖ Granular device naming requirements, often with unique requirements at the school or classroom level
- ❖ Support complex environments, including large numbers of Apple Volume Purchase Program (VPP) tokens
- ❖ Self-service and rapid app deployment on-demand to avoid wait time for IT response, disrupting the learning experience.

SOLUTION

To enhance Intune to meet the needs of modern classrooms, these boards adopted **MovoSuite for Microsoft Intune™**, slashing the cost and effort of managing shared classroom iPads, while empowering teachers with a simple self-service experience.

With Intune and MovoSuite, we were able to reduce our MDM licensing costs by 75%, reduce IT support effort AND deliver a great user experience for our teachers.

~Derek Galipeau, DSB of Niagara

RESULT

The result was a complete solution that delivered the promised cost savings, but also positioned the boards for modern and secure endpoint management.

- ❖ **Unified endpoint management** for Windows, iOS, MacOS, and Android devices
- ❖ **Windows Autopilot** proof-of-concept, included as part of the Intune implementation
- ❖ **Classroom iPad management** optimized for least IT and teacher effort, and a great user experience for all.

Without MovoSuite, eliminating our 3rd party MDM licensing costs with manageable support effort would not have been possible.

~Francis Mailloux, CSC Providence

CALL TO ACTION

Interested DSBs can learn more about MovoSuite for Intune or request a demo at <https://Lumagatena.com/edu>.

Not in Ontario? No problem! MovoSuite is available worldwide for school districts looking to more effectively manage their classroom iPads.

BENEFITS

In addition to the cost savings that come with Intune, MovoSuite delivers several key benefits for IT staff, teachers, and students:

- ❖ **Automated, flexible device naming:** Devices are named based on desired syntax and location identifiers you specify.
- ❖ **Automated Apple Store Setup:** MovoSuite configures Apple VPP tokens automatically, up to the Intune 256 token limit.
- ❖ **Teacher-friendly self-service:** Self-service app deployment reduces class interruptions and calls to IT Support.
- ❖ **Bulk administration:** MovoSuite enables bulk processing of your shared iPad devices or locations contained in an Excel file exported from your asset management or services desk solution.

Ultimately, Intune and MovoSuite reduce overall licensing costs, administrative effort for IT, and virtually eliminating interruptions in the classroom.
